WeldTec®

Clear Quartz Nozzles

Clear quartz glass TIG nozzles for WeldTec® and most standard torches.

. . not just glass . . . but Fused Quartz glass . .

- **3 times the temperature resistance of Pyrex® glass**
- **Zero heat shock breakage due to temperature changes**
- **Tougher than Pyrex® for better durability**
- **Does not out gas impurities like Pyrex®**
- **Does not discolor turning yellow/brown like Pyrex®**

TEC introduced the glass nozzles to TIG torches back in 1955.

These modern fused quartz nozzles offer superior temperature and thermal shock resistance, surpassing Pyrex®, lava and the pink ceramic nozzles for performance.

You can use these quartz nozzles on most industry standard TIG torches using a simple adapter ring. Available in several orifice sizes and several lengths to suit your job requirements.

Made in America.

WT-9, 20 with gas lens.

WT-24 with gas lens.
